

Scope and Mission of ISAAG 2010

ISAAG wants to ensure a lively and meaningful dialogue between and amongst application and manufacturing of architectural glass with related topics such as structural mechanics, associated computation, structural engineering and architectural design.

Based on the great success of ISAAG 2004, 2006 and 2008, we again want to bring together academics, researchers and practitioners from all over the world to review recent achievements, share the latest developments and discuss present as well as future challenges. All together we can promote a better understanding of structural behaviour, bring forward more realistic material and structural-modelling, as well as appropriate regulations.

Who should participate?

ISAAG addresses "glass professionals" and those who want to step in this field. ISAAG pursues this approach by sessions that are held parallel and impart basic knowledge on one side while showing the actual highest level of engineering art on the other hand.

Therefore researchers, structural engineers, architects, designers, consultants, representatives of government organisations and regulatory authorities, contractors, members of developments organisations, representatives of the glass manufacturing and processing companies and many others are welcomed to ISAAG 2010.

Contact

Completed registration forms, abstracts and papers must be sent to the following address. Please use this contact information to let us know about any further issues that we might be able to assist you with.

International Symposium on the Application of Architectural Glass

4th International Symposium on the Application of Architectural Glass

October 4-5, 2010
Munich, Germany

INVITATION & CALL FOR PAPERS

organized by
der Bundeswehr
Universität München

Call for papers

All those who are interested in the field of glass and willing to contribute to the symposium with a lecture or a case-study are strongly encouraged to submit a short abstract containing the title, the main topics, the names of all authors and corresponding contact information. The submission and review process is scheduled as follows:

<i>Submission of abstracts</i>	April 30, 2010
<i>Notification</i>	June, 2010
<i>Submission of papers</i>	July 15, 2010

When & Where

ISAAG 2010 will be held on October 4-5, 2010 and the conference venue will be on the Campus of UniBw München.

The schedule is planned with respect to GLASSTEC 2010 (www.glasstec-online.com) which takes place from September 28 - October 1, 2010 in Düsseldorf (Germany).

Additionally the world-famous “**Oktoberfest**” takes place in Munich from September 18 to October 3.

The campus of UniBw is located in the south of Munich at Neubiberg. You can find directions including detailed maps and transport information on

www.isaag.com → location

Preliminary program

As during the previous ISAAG conferences the program will span two days to offer enough time for discussion despite the plenty of presented information. The opening at 9 o'clock each day will be followed by an alternation of keynote lectures and two concurrent sessions. The symposium will be enlivened by coffee breaks and lunch at the conference venue. First day evening will be topped off by the conference dinner. After further lectures on the second day, conference ends in another highlight: The excursion to interesting examples of architecture in the vicinity.

Of course it is possible to book conference dinner and excursion separately.

Final program will be sent to all participants and can be seen at

www.isaag.com → program

Sponsors

Organisations and companies are welcome to act as sponsors for the conference and to present their products and services in the field of architectural glass.

Registration

The registration form can be found at
www.isaag.com

The participation fee depends on whether you are a speaker, participant, and whether you want to take part in the conference dinner and/or the excursion or not.

The completed and signed registration forms can be sent by mail, fax or email to the addresses listed on the backside in the contact section.

Your registration will be confirmed within two weeks after we will have received your conference fee.

Please do not forget to book your accommodation in Munich separately. Thereby please consider the nearby “**Oktoberfest**”.

See you at ISAAG 2010!
